This artist draws beautiful butterflies. The illusionary world is created by freely combining the background patterns seen in works of the Rimpa school, pure gold foil made in Kanazawa and detailed description using acrylic paint. He depicts ecosystems in great nature dynamically and delicately. His unique viewpoints and styles are persuasive since he lives with awe and admiration for all kinds of lives. Komatsu, who has always been an outdoor person and who likes collecting insects and observing nature, set up his atelier in Miyazaki where he was born.

His artworks were featured in 2010 COP10 (Conference of the Parties) followed by the United Nations General Assembly held in 2011. Collected by The Wharf, Art Collection, Hong Kong.
