

# Chang, Hyun-Kyung

## <Artist Statement>

Hometown, nostalgia, reminiscence and longing for childhood, and my family, all of these are always in the memories of my life. For me, those memories have made a motivation to reflect myself and finally make me find my own identification continuously. I have expressed the space of houses and the time of memories by adding the colors of paint and altering the hues of colors. That is, my memories lie in the physical space through the overlapped houses and in the time through the altered colors. I think I have tried to expose myself in the time and space which contains my memories, and then to interpret the meaning.

## <Profile of Chang, Hyun-Kyung>
