

Mayté Guzmán – art narrative

I am inspired by the movement of the body on canvas, with the speed by which the movement occurs in that precise moment, and the gestures occurring in that movement. The impromptu and accidental nature of the work, and its random dripping of paint, are inspirational and give birth to a work that is spontaneous, powerful, organic and expressive. My intention is to convey energy, passion and strength to the viewer, and to spark their curiosity.

I hope that my work transmits the particular thoughts that occur in a singular moment, perhaps producing an unintelligible language with a hint of organic memory, which transports us to another dimension of a non-existent world.
