

### **MAK Wai-hung (Hong Kong)**

Wai-hung paints the facial features in a similar style and so there are small changes in the expressions. But when you look at these figures closely, they have their own personalities. Their unique forms convey a sense of humour which cannot be named.

As a matter of fact, Wai-hung enjoys very much when doing his creation. He wears thick glasses, but he observes well, so he is very good at painting certain things. Being very short-sighted, he will watch first, then paint, and finally finishes his works step by step.
