

Ekaterina Fedulova
Russia

Cats, fish and snails. And very feminine angels.

Even the titles of her exhibitions are touching, ironic & affectionate, always with an inside playful idea.

The amazing, beautiful artist from Russia, Saratov - Ekaterina Fedulova, brings to the world cheerfulness and love of life through her paintings. They glow from the inside, very energetic in color, and the manner of execution resembles stained glass on canvas, through which the light pours.

Paintings of Ekaterina are very positive, the choice of subjects and a rich, bright color range speak about it. The artist's works resemble colorful pictures of a kaleidoscope, the viewing of which is pleasing to the eyes. Her artworks are deliberately mosaic, each piece of space is filled with details, but this congestion is not accidental: color patterns and figures are symbols possessing a charge of creative thought.

The creativity of Ekaterina may seem naive and childish. But this fact does not bother the painter - she will be happy if the viewer, looking at her fairy-tale world, briefly plunges into pleasant memories, feels a tide of tenderness and smiles kindly.

Born in 1979, the city of Engels, Saratov region, Russia, in the family of artists Tatiana and Igor Sorokin.
