Artwork explanation in ACAS website

Jordan

Hong Kong Subway’s Jordan station has green livery. The green mosaic evokes a nostalgia for modernity. Like a simple stage set does, the painting makes a realistic space appear unrealistic. The unrealism in the painting makes the audience feel a certain déjà vu.

Spring

“Spring” represents time-travel. It’s an image grasped whilst constantly moving between the past and the present. It warmly and yet lonely presents the Spring of an exotic country travelled far back.

GoSung

A man stands watching the sea after rain has fallen in GoSung. The blue shades and grey tones that foreshadow a dark atmosphere makes the painting look gloomy and lonely. But the shades of yellow and green make it possible to find hope in depression and loneliness.
