**Psychology of creation:**

My mother's pregnancy reaction was unusually strong at the initial stage of being pregnant of me and the doctor suggested termination of pregnancy for several times, but my mother bore unthinkable pain doggedly for ten months and gave birth to me. How great my mother's love to life is and I still deeply miss her even though she's dead for more than ten years due to illness. My works mostly present the female for giving expression to my gratitude feelings to my mother. My works are themed by showing maternal love as well as love for life and nature.

**Works instructions:**

Strong primitive consciousness and naïve children's mind exist in my works. With several kinds of painting vocabularies and self-perpetuating denying and surpassing, I integrate Chinese traditional art and contemporary aesthetic taste, reveal personal subjective image between concretization and abstract at will as well as more energetically release free will and emotional experience to realize spiritual pleasure and express internal, instinct, frank and naive soul in the game. My works are of originality, independence and uniqueness without replicability.
