

Since its foundation in 2012, Ying Gallery has exhibited the marvelous works of 30 domestic and overseas artists in its 18 exhibitions.

Modern art mirrors the history, culture, and social development of different countries against the background of globalization as well as the individual's condition of life. Therefore, artists' works and modes of manifestation in each historical period can become the marks of this age. Ying Gallery has the visions of reviewing and inheriting history based on the self-cognition cultural consciousness and encouraging outstanding artists who express innovation and independent thinking in their modern artistic works. We aspire to develop Ying Gallery into an international art platform for the communication among artists and art lovers. In this way, ordinary people can get access to art more easily and we can contribute to Chinese modern art's appearance on the global stage.
